VELCO LMS ID# _____

VELCO line # _____

Structure # _____

Date: _____

The undersigned hereby grants to Vermont Electric Power Company, Inc. and VT Transco LLC, its contractors and agents, together "VELCO", permission to enter his/her/its property located at

CHARLOTTE PARK / WILDLIFE REFUGE - CHARLOTTE, VT

_____,

to perform routine vegetation management within the VELCO transmission right-of-way using chemical methods of treatment. Chemical treatment of vegetation may include Low Volume Foliar, Low Volume Basal, and Cut Stump herbicide application methods. VELCO shall use only those herbicides for right of way vegetation management that are approved and permitted for use by the Vermont Agency of Agriculture.

The chemical treatment type(s) to be utilized will be:

✓ Low Volume Foliar (treatment to the leaves of incompatible vegetation)

___ Low Volume Basal (treatment to the stems of incompatible vegetation)

✓ Cut Stump Treatment (treatment to the cut stumps of incompatible vegetation)

This permission is granted:

___ for as long as the undersigned owns the property

✓ for the current year treatment cycle only

Notes: Low volume foliar spray or cut stump treatment may be used to treat incompatible vegetation and invasive trees and shrubs within the transmission corridor. Treatment may also include foliar spray of wild parsnip located in the corridor. In order to coordinate Park management of invasive plants with VELCO management of the corridor, VELCO's Right of Way Forester will contact the Town (Dean Bloch, Town Administrator, 425-3071) at least one week in advance of treatment.
