Charlotte, Vermont

Dear Tom:

I inspected the partial reconstruction of the mound system serving the above referenced residence. Construction was completed by Clarks' Septic Service last November.

In accordance with section 11 of the permit: "I hereby certify that in the exercise of my reasonable professional judgment the installation-related information submitted is true and correct and the wastewater system was installed in accordance with the permitted design and all permit conditions, was inspected, was properly tested, and has successfully met those performance tests."

The owner is encouraged to review and follow the operation and maintenance notes provided on the plan. Eroded or settled areas may require repair this spring. Additional seeding and mulching may be necessary as well.

Feel free to call if you have any further questions or concerns regarding this matter.

Sincerely,

Justin Willis
ANR Licensed Designer
