Re: John & Kathleen Linger, Holmes Road, Charlotte, Vermont
Construction certification
Case number: WW-138-0826

Dear Tom:

We are writing on behalf of John & Kathleen Linger, regarding the construction of a replacement wastewater system at their former property at 208 Holmes Road in Charlotte. The system was designed, constructed, and inspected a number of years ago. Because the Lingers were interested in having the house formally recognized as having 4 bedrooms and the Town of Charlotte's requirement that a permit be issued for it specifically designating the number of bedrooms, a State wastewater permit was applied for on September 26, 2008 and was issued on December 4, 2008.

This letter is a reiteration of one issued by this office on October 11, 2004, but also includes the language quoted below as required by the permit. Based on our observations on September 16 and October 1, 2004, we found the wastewater system to be installed substantially in accordance with the approved plans entitled "Linger Property, Holmes Road, Charlotte, Vermont; Wastewater System Design, Sheet S1" last revised on 6-18-04 and "Linger Property, Holmes Road, Charlotte, Vermont; Wastewater System Details and Specifications, Sheet D1", last revised 6-12-04, prepared by Lamoureux & Dickinson Consulting Engineers, Inc. We offer the following statement as required by Condition 11 of the above-referenced permit:

"I hereby certify that, in the exercise of my reasonable professional judgment, the installation-related information submitted is true and correct and the potable water supply and wastewater system were installed in accordance with the permitted design and all permit conditions, were inspected, were properly tested, and have successfully met those performance tests."

If you have any questions or need additional information, please don't hesitate to contact me.

Sincerely,

Brian Tremback
Certified Professional Soil Scientist
