ANR Form 5: Certification Statement for Wastewater System and Potable Water Supply Permits when there is no Required Notification of Overshadowed Property Owner(s)

A person submitting an application to the Secretary for a Wastewater System and Potable Water Supply Permit shall use this statement whenever overshadowing notification of affected landowners is not required (see guidance and instructions for examples).

Note: When the property subject to the permit application is owned by more than one person, only one of the landowners must sign this certification statement even though all landowners must sign the permit application itself.

I hereby certify that "overshadowing" notification is not required either because there is an exemption to the notification requirement or there are no landowners whose property may be affected by the proposed water and wastewater systems.

| Project Status | Underground storage tank removed. Contamination found. Investigation needed. First letter written in July 05. EPS VT conducting site investigation. Minimal groundwater contamination was detected during two monitoring events. Soil contamination appears to be restricted to the immediate vicinity of the former tank. Most of the contaminated material is believed to have been removed during the tank closure event. Recent analysis of the drinking water supply well found no detection of VOCs. Monitoring wells have been properly abandoned. |
