Subject: Water Operator Proposal --Town of Charlotte
Date: Wed, May 7, 2014 9:57 pm

Hi Dean

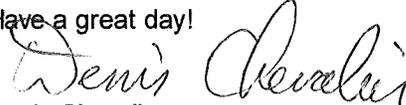

Here is my proposal for becoming the Water Operator for the Town of Charlotte:

Monthly Water Operator	
Fee	\$125/mo

This fee includes all water testing as per the monitoring schedule provided by the State of Vermont for your particular water system. All water test kits shall be paid for by the town of Charlotte. Any additional testing will be billed on a per hour basis at \$65/hr. This price includes filling out a monthly operations report to report your metered water use, as required by the State Of Vermont, and based on the reading and reporting of the meter reading to me by your office each month. The other maintenance matters (filling the salt tank, changing the cartridge filters, etc) would be billed at a rate of \$65/hr including travel one way.

Dean, thanks for the opportunity to submit this proposal. As I like to tell people, when you hire me, you get two for the price of one since I have spent a lifetime in the water system arena, specializing in design, installation, and repair of systems like yours, as well as being a water operator for many years now. I hope to be able to put those skills to work for you.

Have a great day!

Denis Chevalier
Class 3 Water Operator (License # 2906)
