**RE: INSIGNIFICANT WASTE MANAGEMENT EVENT APPROVAL
IWMEA: ICH187
Concrete and Bituminous Concrete Disposal
Crabbe Property, Charlotte**

Dear Sirs:

The Vermont Agency of Natural Resources, Solid Waste Management Program has reviewed your July 21, 2016, request for approval to dispose approximately 7,500 cubic yards of concrete and up to 1,000 cubic yards of bituminous concrete from the reconstruction of US Route 7 in Charlotte (FEGC 019-4(20)) at two disposal sites. One proposed disposal site is on the property of John Crabbe, 5692 US Route 7, Charlotte.

Based upon a review of your application, the Secretary of the Agency of Natural Resources has determined that the proposed disposal activity will not result in a threat to the public health and safety, the environment, or create a nuisance and therefore qualifies as an Insignificant Waste Management Event, as provided for under Section 6-301(c) of the Vermont Solid Waste Management Rules. This determination is conditional on compliance with the representations contained in the application and the conditions provided under this approval letter.

You are hereby granted approval to dispose of the above referenced waste consistent with the Insignificant Waste Disposal Event Guidance Document and your application. This approval is specific to the wastes generated during this project as described above and does not allow for the disposal of wastes of other types or from other sources. Upon the end of the construction season and project completion, the disturbed fill area shall be graded to a maximum 3:1 slope and shall be seeded and mulched. Erosion control measures shall be maintained where appropriate to prevent sediment discharge to the waters of the state or to wetlands during operation and until the site is fully stabilized. Under no circumstances shall disposal or filling occur within a wetland or its associated buffer.

This approval allows disposal activities to occur on the Crabbe property during the 2016, 2017, and 2018 construction seasons, and expires upon project completion or October 31, 2018, whichever is sooner. This approval does not provide authorization of any activity in lieu of Act 250 or other state or local laws which may also govern. Please contact Buzz Surwilo at 522-5056 should you have any questions.

Sincerely,

Dennis Fekert
Chief, Certification Section
Solid Waste Management Program
