

TO THE BOARD OF SELECTMEN OF THE TOWN OF CHARLOTTE, VERMONT

Comes the Green Mountain Power Corporation, your petitioner, and respectfully represents that in order to furnish adequate service to its patrons in the Town of Charlotte it is necessary to install poles and associated guys and wires (if needed) in the following locations and as depicted on the accompanying site plans:

- Nine poles, guys and wires within the town right of way along and adjacent to Association Way. This includes three new poles to complete a loop between Flat Rock Road and Association Way, the relocation of one pole adjacent to 157 Association Way, the replacement of one condemned pole adjacent to 263 Association Way (along with a new stub pole and anchor on the opposite side of Association Way) and three new poles to relocate the services attached to trees feeding 209, 211 and 263 Association Way as well as 39 Town Way.
- On North Shore Road we would like to replace a total of seven poles that are either very old or do not provide proper clearance over the roadway. Upon completion of this work, Waitsfield Champlain Valley Telecom will be attaching along these routes, and once WCVT does this, GMP will remove the old poles.

There will need to be a few trees removed on North Shore Road, those have been tagged with orange ribbon, we would also like permission to do minor trimming along the entire route.

The Company further represents that such work will be done in accordance with the plans and specifications attached, and in a manner safe for public travel and subject to the rules thereof. Also, that it is not desirable to make such locations otherwise than shown on the attached plan.

WHEREFORE, your petitioner requests permission from the Board of Selectmen to locate poles guys and wires as aforesaid.

Dated at Colchester, Vermont, this 11 day of October, 2016.
