Subject: Kristopher Larson Driveway adjustment Request

Hi Dean,

Thank you for taking my calls over the past few days. I am emailing you per your request, to move my driveway at 1057 Lake Road. We have already been approved for the driveway but upon closer inspection, Steve Denton and Jr. Lewis recommend that I move the driveway approximately 100' to the West. This would serve 2 purposes:

- 1) Less impact on the area in that a culvert would not be needed which also eliminates the need for extra trenching.
- 2) Better visibility to the West as there is no longer a telephone pole creating some obstruction in our original driveway location.

By moving the proposed driveway, we still fall within the 250' sight requirement.

Also during our initial conversation, you asked how far away the new proposed driveway would be from the existing seasonal drainage swail. We measured this distance which would be approximately 150' from the swail.

Please confirm that we are on the select boards agenda for August 24th and the exact time our request will be presented.

Please let me know if I need to provide any materials for this meeting.

Thanks again,
-Kristopher
