Re: Grant application for Ahead of the Storm Site 2 project at the Charlotte Park and Wildlife Refuge

The Charlotte Selectboard supports the 2017 Watershed Grant Application for implementation of the Ahead of the Storm Site 2 project at the Charlotte Park and Wildlife Refuge. The Park protects open land, wildlife and natural areas—and provides public access to trails and scenic vistas. The Ahead of the Storm projects will improve erosion-prone areas and help control stormwater runoff into streams that carry water to Lake Champlain. The strategies implemented at the Ahead of the Storm project locations can be used in other areas of the Park, and the sites used to demonstrate, to visitors of the Park, up-to-date land management practices.

Thank you for your consideration.

Sincerely,

Lane Morrison, Chair  
Town of Charlotte Selectboard
