RE: Trono Lot 1/Lot 4 Properties, 471 & 610 Fat Cow Farm Circle, Charlotte, VT – Permit Amendment to WW-138-1104-1

Dear Jeannine:

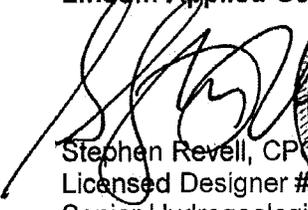

WW-138-1104-1 permitted a well shared between Lot 1 and 4. The well, located on Lot 1 was drilled with results suitable for a single family dwelling but not for a shared well for 2 residences. Because the well is located on Lot 1, it will solely serve Lot 1. To deal with Lot 4, a complying well site was located and drilled, understanding the WW-138-1104-1 permit would have to be amended with an As-Built Site Plan, a full WW application and a \$250.00 fee. The Lot 4 well was drilled with result suitable for a single family residence.

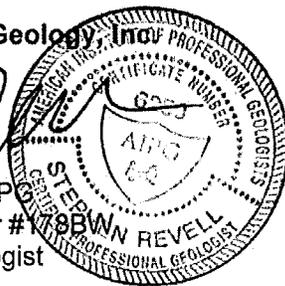

A full signed application and existing, revised or newly prepared and signed Figures 1-4 are attached along with a signed ANR Form 5 and the application amendment fee of \$250.00. I've also included 11' x 17' signed figures and a CD of the entire permit application amendment. Peter Trono and I look forward to your satisfactory review and issuance of the requested permit WW-138-1104-2. To ensure a complete submission, the Lot 4 certification and inspection letter is included with this permit amendment application.

If you have any questions, please give me a call.

Very truly yours,

RE: Trono Property, 471 & 610 Fat Cow Farm Circle, Charlotte, VT, WW-138-1104-1, Lot 4 Inspection and Certification Letter.

Dear Peter:

In an effort to fulfill State water and wastewater regulations, Town zoning regulations and ensure a clear title for your property, I've conducted the required inspections of the subject water and wastewater disposal systems. I offer the following required inspection and certification report which should be recorded in the Town land records.

In this regard, between November 4, 2014 and May 12, 2015, Manosh Well Drilling, Steve Denton Excavating, and Stephen Revell, Licensed Designer #178BW properly sited, constructed and inspected the drilled bedrock well and water service connection to the house and the Lot 1/Lot 4 shared wastewater disposal system for the Lot 4 residence. All required inspections were conducted including the well location and water service connection to the residence; building sewer, septic tank, pump station and force main placement; shared trench and distribution box placement; force main/D-box connection; hydraulic testing; fabric placement and trench system covering; and final grading. In all regards, the subject water and wastewater disposal systems were constructed in accordance with my design which was subsequently approved under WW-138-1104-1 by the Town of Charlotte on behalf of the State of Vermont. Based upon my inspections I am now in a position to certify that the subject water and wastewater disposal systems are operational and indicate to the Town of Charlotte that the property qualifies for a Certificate of Occupancy relative to them. In this regard, "I hereby certify the installation and related information submitted is true and correct and that in the exercise of my reasonable professional judgment, the approved water and wastewater disposal systems have been installed in accordance with the design and all design conditions and the "as-built" drawing, were inspected, were properly tested and successfully met those performance tests."

In closing, to ensure long life to the wastewater system, the septic tank should be pumped every three years and the effluent filter in the septic tank should be cleaned in the spring and fall. The access points for the septic tank and pump station are at grade and easily located.

If you have any questions, please give me a call.

Very truly yours,  
Lincoln Applied Geology, Inc.

**Part V Water Supply Information**

**Section A - Water Supply Screening Questions**

- 1 Are you proposing a new water supply or water service line or changes to a permitted but not constructed water supply or water service line for this project?  Yes  No
- 2 Are you proposing changes to an existing water supply or water service for this project (including changes to location, design flows, or operational change)?  Yes  No
- 3 Is there an existing connection to a water supply or water service line for this project?  Yes  No

*Complete Part V if you answered Yes to any of the above questions. A project with no existing or proposed water supply may skip to Part VI.*

**Section B - General Water Supply Questions**

- 1 Does this project involve a failed water supply?  Yes  No
- 2 Will any of the proposed water sources serve 25 or more people or have 15 or more service connections?  Yes  No  
*If Yes, the applicant must contact the Drinking Water & Groundwater Protection Division at (802) 241-3400 for source, construction and an operating permit.*
- 3 Are any of the existing or proposed water sources located within a special flood hazard area?  Yes  No
- 4 Are any of the existing or proposed water sources located within a floodway?  Yes  No
- 5 Are any of the proposed water sources located within 1 mile of a hazardous waste site as designated by the Waste Management Division and identified on the Agency mapping website?  Yes  No  
*If Yes, please submit additional information on the site. The Waste Management Division can be reached at (802) 241-3888.*
- 6 Does this project require an approval letter from the Drinking Water & Groundwater Protection Division for the construction of a public water system, municipal water line extension over 500 feet, or hydrants or sprinkler systems?  Yes  No  
*If Yes, please submit a copy of the approval letter from the Drinking Water & Groundwater Protection Division.*
- 7 Does the proposed or existing water supply(ies) use a water treatment device to obtain compliance with the quality requirements in the Water Supply Rule?  Yes  No  
*If Yes, please submit additional information regarding the constituent(s) that exceeds the standards and plans, details, and specifications of the treatment device.*
- 8 Is any portion of the proposed water supply located in or near a Water Source Protection Area as designated by the Drinking Water & Groundwater Protection Division?  Yes  No  
*If in areas of known interference issues, contact the Drinking Water & Groundwater Protection Division at (802) 241-3400.*

**Section C - Individual Water Supply Details**

Please provide the following information for each of the existing and proposed water supply(ies) serving a building or structure, or campground on the property.

**ANR Form 5: Certification Statement for Wastewater System and Potable Water Supply Permits when there is no Required Notification of Overshadowed Property Owner(s)**

A person submitting an application to the Secretary for a Wastewater System and Potable Water Supply Permit shall use this statement whenever overshadowing notification of affected landowners is not required (see guidance and instructions for examples).

Note: When the property subject to the permit application is owned by more than one person, only one of the landowners must sign this certification statement even though all landowners must sign the permit application itself.

**I hereby certify that "overshadowing" notification is not required either because there is an exemption to the notification requirement or there are no landowners whose property may be affected by the proposed water and wastewater systems.**
