

Mt. Philo Barn

Photo 1. Light fixtures to be added to the barn. 4 on the east side and 2 on the north and south side.

Photo 2. This is similar to what we would like the barn to look like. The stone pathway leading to the door is the style that we would be using for all walkways. We would like to paint the barn a dark blue with the cross boards being cream, similar to the picture. We would not make any structural changes, just replace the existing windows and doors. Our intent is to use the east side for an entrance

Photo 3. These are the doors we would like to replace the large barn doors with. This keeps the aesthetic of the barn on the outside, but gives us use of more functional doors for event days.

Photo 4. Inside we are going to keep the barn very traditional, adding signature globe lighting for a sophisticated look.
