**Re: Ross Proposed Residential Expansion
State Wastewater & Potable Water Supply Permit
720 Dorset St, Charlotte, VT 05445**

Dear Mr. Rheume:

Please find attached an application, plans, CD, and fee for Andrew and Erin Ross who are proposing to add an additional septic tank and associated piping to connect an accessory bedroom to their existing disposal field at their residence at 720 Dorset St.

Current water and wastewater flows are 420 gallons per day. The existing disposal field was sized for 600 gpd, and can support a one-bedroom addition (140gpd) to the residence without expansion to the disposal field. We have attached a reference plan of the originally approved design.

Water service from the drilled well will remain in place. Water service lines need to be extended from the existing residence to the proposed bedroom structure.

This completes our summary of the proposed application. If you should have any questions, please feel free to contact me at 864-2323 x305.

Respectfully,

Billy Roberts
Staff Engineer
