

West Charlotte Wastewater Committee

DRAFT Minutes 6/2/2011

Members Attending: Vince Crockenberg and Dave Marshall

Others Attending: Winslow Ladue

The group discussed the finding of the Senior Center's permitted sewage flows were greater than we had earlier assumed. The permitted flows 4-12-01 were 2,000 gpd; earlier we had used the value of 450 gpd.

Dave explained that the earlier numbers were based on a "church supper" type flows and the later numbers were based on a "restaurant serving two meals a day" flow rate.

Vince and Dave agreed to attend the next meeting of the Senior Center to discuss this "mistake" and ask if they would be willing to be permitted for the "church supper" type flows rather than the "restaurant" flows.

We decided to push back our meeting with the Selectboard until this issue is sorted out. We will be asking for a new time, perhaps July 11th or 25th.

Next Meeting Date

June 14th, unless otherwise warned.
