***Re: 1914 Prindle Road Disposal System upgrade, Charlotte Vermont***

Dear Jeannine,

I have enclosed the disposal system upgrade for the existing residence and associated barn structure at the above mentioned parcel on Prindle Road. The current owners are intending to upgrade the current "barn" system that currently handles the wastewater from the accessory bathroom and plumbing in the barn. The proposed mound disposal system is intended to upgrade the current disposal system for the barn while also providing future replacement capacity for the existing residence. The existing disposal system at the residence appeared to be functioning as intended with no apparent signs of failure at the time of my site visits. The current drilled well adjacent to the residence supplies the residence and barns with no changes to flows proposed at this time. Overall, this proposal is intended to upgrade a substandard disposal system and provide future replacement capacity for the existing residence. If you have questions regarding the proposal feel free to contact me. Thank You.

Sincerely,

Spencer K. Harris, for
