**Re: WW-4-2110, Statement of Construction, Perry Farm Lot 14  
Walter, 250 Sanctuary Lane, Charlotte, Vermont.**

Dear Tom:

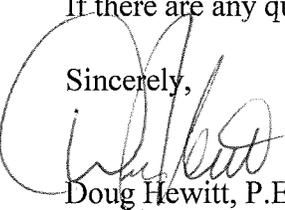

As directed by the conditions of the above referenced permit we have corresponded with the contractor, Chris Spence and made site visits to inspect the septic system features specific to the referenced lot. Included in this was the installation of the septic tank, pretreatment unit (2/23/11) (with Ahnna Lake of Biofilter), final grading and permanent wiring.

Based on our construction inspection as described here, for the applicable portions of the septic system, I hereby certify that, in the exercise of my reasonable professional judgment, the installation-related information submitted is true and correct and were installed in accordance with the permitted design and all permit conditions, were inspected, were properly tested, and have successfully met those performance tests.

This letter covers the certification of the completed septic system construction for this lot, which should now be considered adequate for occupancy and use.

If there are any questions or you need additional information, please give me a call.

Sincerely,

  
Doug Hewitt, P.E.  
Project Engineer
