Subject: VT Wildflower Farm Water System

Hello Peter,

Just want to restate that a new Source Permit will not be required for the proposed changes in ownership/water allocation for the VT Wildflower project. You indicated that the Construction Permit Application was about to be submitted. So to keep the project moving along, please contact Meredith Simard [Meredith.simard@vermont.gov](mailto:Meredith.simard@vermont.gov) for information about requirements that must be completed before the water system can be operational and serving as a public system. She has forms/schedules/info. sheets on ownership changes, water sampling and operator requirements etc. Thanks.

Ken
