Subject: Sarah Soule, 0.7+/- Acre Parcel, 42 Wishbone Lane, Charlotte, Vermont - Potable Water Supply and Wastewater System Permit Application

Dear Joe:

Enclosed are two (2) copies of the Sarah Soule full size design drawing, two (2) copies of the 11" x 17" design drawing, electronic copies of the design drawings in PDF format, and the required supporting documents (paper and electronic copies) for a replacement water system for her 0.7+/- acre developed parcel located at 42 Wishbone Lane in Charlotte. The property is improved with a 3-bedroom seasonal dwelling that is served by a mound wastewater disposal system and is provided water by an on-site cistern-type water system.

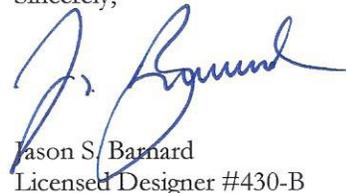

In order to convert the property from seasonal to year-round occupancy, Sarah Soule is applying for a Potable Water Supply and Wastewater Disposal System Permit so that a replacement drilled bedrock water supply water system can be installed that will provide water to the 3-bedroom year-round single-family residence. Further, the existing mound system will continue to be used properly treat and dispose of domestic wastewater generated by the 3-bedroom single-family residence. Based on a review of the mound area this spring and also a review of the Phelps Engineering design drawings, the existing mound system is adequately sized to dispose of wastewater generated by the 3-bedroom residence.

Included to facilitate your review of this permit application are the following:

1. Check made payable to the Town of Charlotte for the amount of five hundred dollars (\$500.00).
2. State of Vermont, Agency of Natural Resources, Potable Water Supply and Wastewater System Permit Application.
3. Landowner Notification Exemption Form No. 5.
4. Hand Auger Soil Boring Log.
5. 11" x 17" Design Drawing No. 1 dated May 27, 2016.
6. Full Size Design Drawing No. 1 dated May 27, 2016.

Should you have any questions or comments relative to the information submitted herein, please do not hesitate to call me at (802) 453-2597.

Sincerely,

Jason S. Barnard
