**Re: Wastewater System and Potable Water Supply Permit Application
Permitting of Existing Wells – 323 Upper Old Town Trail, Charlotte**

Dear Joe,

Please find enclosed application materials submitted in pursuit of Wastewater System and Potable Water Supply coverage for three (3) existing potable water supply wells for an existing 5-bedroom single family home at 323 Upper Old Town Trail in Charlotte.

This application is seeking permit coverage for three (3) existing potable water supply wells. The first well was drilled in 1997, with tag #1-112. In 2000, this existing well was deepened and assigned tag #16116. When this well began to produce dirty water and ran dry, a second well, tag #40716, was drilled in 2008, but no exemption form was recorded in the land records for a replacement well. When the second well began to produce dirty water and ran dry, a third well, tag #49283, was drilled in 2014. At this time, an exemption form was recorded but it is inapplicable, as the exemption does not apply to a situation with more than one well operational. The locations of the aforementioned wells are depicted on the enclosed Existing Conditions Site Plan.

If you should have any questions, comments, or if any additional information is required please feel free to contact me at 864-2323 x309.

Respectfully,

Michael Koch
Staff Engineer
