Re: Completion Inspections, 3046 Greenbush Rd. Charlotte, Vermont, WW-138-1610

Dear Joe,

I am writing in regard to the replacement disposal system installed at the above mentioned residence on Greenbush Road in Charlotte. I performed site visits during the installation of the disposal system by SMB Landscaping and on 12/21/16 reviewed the disposal trenches prior to covering. A recent follow up site visit was performed to review final grading. Based on my inspections during the construction it is my opinion the replacement disposal system was constructed in reasonable conformance with the approved plans and is connected to the residence. Therefore,

"I hereby certify that the installation-related information submitted is true and correct and that, in the exercise of my professional judgment, the wastewater system have been installed in accordance with the permitted design and all permit conditions, were inspected, were properly tested, and have successfully met those performance tests."

In summary, the system was constructed in reasonable conformance with the plans and is operational at this time. If you have questions regarding the system feel free to contact me.
Thank You.

Sincerely,

Spencer K. Harris, for
